

Xpress Technologies ELD

One Journey at a Time

Providing carriers like you with consistent and reliable freight that is tailored to meet your specific needs and preferences: One Journey at a Time.

Xpress Technologies ELD

The Xpress Technologies ELD is the only device of its kind designed to make you as profitable as possible. No monthly costs, no fees. In addition to a full suite of Hours of Service, DVIR, and eLog tools, the Xpress Technologies ELD enhances how you get freight by learning and improving future load recommendations each time you book a load.

Your Loads

Loads tailored to your individual preferences through our advanced technology.

Your Business

Freight management for easy tracking and fleet visibility on all loads, not just Xpress Technology loads.

Your Voice

Early access to future functionality and ability to offer direct feedback for product enhancements.

Your Way

Reduce check calls through seamless tracking and earn dedicated lane opportunities.

Available on both Android & iOS

DEVICE COMPARISON

Xpress Technologies offers two different types of devices at no cost to you: The Xpress Technologies ELD and the Xpress Technologies Load Optimizer. Both of these plug & play devices unlock and enhance additional freight opportunities. The Load Optimizer is provided to carriers who want to take advantage of reduced check calls, freight management functions and dedicated freight opportunities but want to retain their current ELD provider. Carriers who opt for the Load Optimizer can always request their devices be upgraded to include the ELD functionality at no additional cost. Here is a comparison of a Xpress Technologies Load Optimizer installation vs. an Xpress Technologies ELD installation.

FEATURES	Optimizer	ELD
